

## **The announcement of Transparency International in Poland about the procedure of appointing a person who will perform the function of Attorney General:**

In connection with the completion of the procedure of appointing two candidates for the office of Attorney General by National Judicial Commission, Transparency International in Poland has a hope that regardless of the choice made by the President of the Republic of Poland, the person appointed for this responsible office will take proper, decisive steps to improve the functioning of the public prosecutor's office.

Taking into account the aims of our association, Transparency International in Poland expects immediate responses to all alarming phenomena which occur in the structure of the public prosecutor's office (especially on its lowest level), such as taking action in case of conflict of interest, giving in to corruption and the pressure of local circles and the lack of response to signals of the possibility of committing a crime of corruption reported by citizens and non-government institutions.

Simultaneously, Transparency International in Poland expresses its satisfaction with the implementation of the stage of "public introduction" in open competition for the office of Attorney General. TI also wishes the winner to succeed in improving the current state of affairs.
